## FLEXWALL

Flexwall is the leading name in precast, prestressed, insulated concrete wall systems. Satisfied customers have come to rely on Flexwall to meet their need for quality, speed, aesthetics, durability and price. Manufactured in Pre-Con's modern production facilities, Flexwall is a complete wall system, inside and out. Flexwall panels feature attractive ribbed exteriors and smooth steel-formed finished interior surfaces that require no extra finishing.

### Economical

Designed for rapid construction, energy efficiency, low maintenance

### Custom made

Panels are designed to accommodate windows, doors, loading docks and other openings

### Full-width rigid insulation

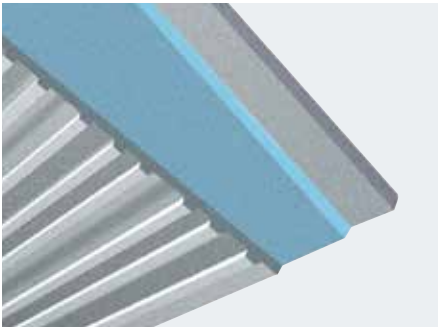

Can be adjusted in thickness and density to meet specific thermal R-value requirements

### Finished surfaces

Attractive ribbed exteriors and smooth interior surfaces that require no extra finishing

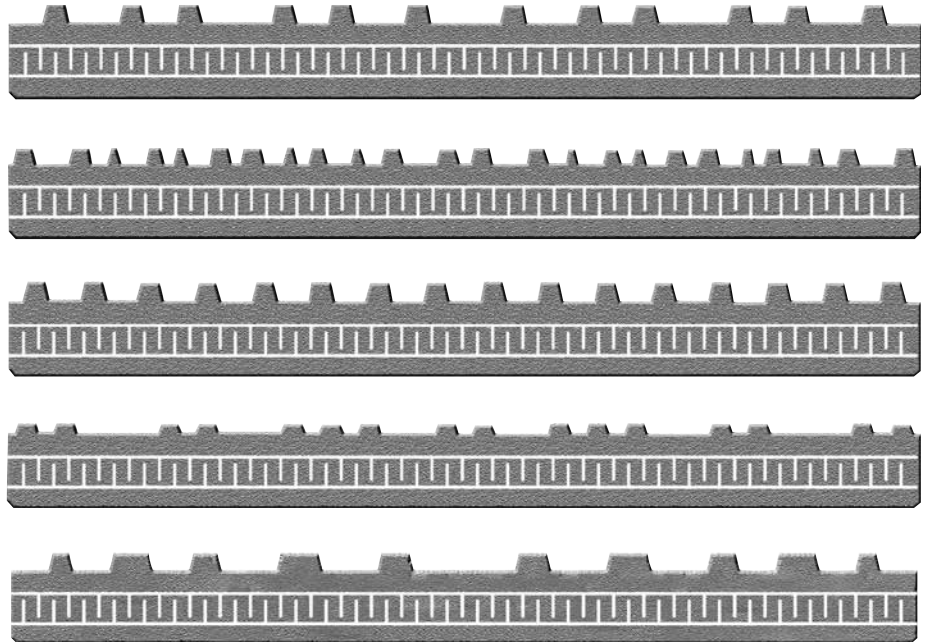

## TYPICAL APPLICATIONS

- Retail stores
- Industrial buildings
- Commercial warehouses

Flexwall bonds full-width insulation between an exterior wythe of durable ribbed concrete and a smooth, steel-form finished interior wythe for energy efficiency that's virtually maintenance-free.

## EXTERIOR WYTHE RIB PROFILES

Traditionally, the industry standard overhead door opening width has been 2.4m. More and more, new developments are now specifying door openings ranging from 2.6m to 3.0m wide. Pre-Con's Flexwall panel module can easily be customized to accommodate these new requirements.

As a leading provider of architectural and structural precast solutions in Ontario, Pre-Con brings a wealth of experience to every project. We provide innovative design, fabrication and construction services in a variety of market sectors with a commitment to quality and safety. When performance counts, **Pre-Con is ready to deliver.**
