

# PRECAST TUNNEL LINER

Custom precast concrete products used  
in large diameter tunnels

**PRE-CON**<sup>®</sup>

When performance counts.

[pre-con.com](http://pre-con.com)

## PRECAST TUNNEL LINER

Pre-Con's tunnel liners are specialized precast concrete products used in large-diameter, bored tunnels. The liners are manufactured to a specific design radius in a series of segments. Segments are installed in the field to form a complete ring that supports the surrounding soil and rock.

### Consistent quality

Proven strength, durability and dimensional accuracy of precast concrete

### Custom fit

Segment thickness, length and radius designed for specific tunnel requirements

### Assured supply

Pre-purchase and manufacture eliminates construction delays

### Cost-effective

Precast tunnel segments are more economical than poured-in-place large diameter tunnels

## TYPICAL APPLICATIONS

- Transit applications (subways, light rail)
- Sewer and water conduits

## REPRESENTATIVE DRAWING

As a leading provider of architectural and structural precast solutions in Ontario, Pre-Con brings a wealth of experience to every project. We provide innovative design, fabrication and construction services in a variety of market sectors with a commitment to quality and safety. When performance counts, **Pre-Con is ready to deliver.**
